Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

I thought I liked this map book until I was out with a friend in a remote area of NM and her DeLorme had more detail on the roads. Without the DeLorme we likely would not have found our destination.

This book will certainly help me find many wonderful attractions throughout New Mexico. Maps are laid out clearly. I would like clearer closeup maps of the cities. The information sections in the recreation maps has plenty of interesting sites to visit and explore. I don't think I will miss many places of interest with this guide.

Bought it to replace my 1995 edition. Was disappointed that the city street maps in the old edition are not included in this new version.

I love how this series lists government, indian, blm, national forest, etc. land in the first section of the book, and lhas informative text on campgrounds etc, plus phone numbers. Just about the right amount of information, and it seems relatively UNCLUTTERED. Did I mention UNCLUTTERED? as I recall, I think DeLorme may give too much information in their maps.....

Useful and comprehensive, easy to use with clear divisions, symbols and scale info. Good size to sit on the 'navigator's' lap. Could use a few more city maps.

This is my second edition of this map and it is just as great as always.

It's mostly good but not quite as detailed as I wanted. I found myself having to fall back on Google Maps at times.

We used the Atlas for travelling around New Mexico by car. Our GPS navigation packed up right at the start. However the maps and city details were OK to get around without getting (too) lost. We could not use the Google Maps App (since data roaming was switched off to avoid excessive overseas costs). One criticism is that there is little overlap between the map sheets.
