## **Customer Reviews**

I love this science text- As a biology major and a professional that tutors and helps local teens with their science curriculum- this book is fantastic! It is easy to read, concise and the chapter summaries make studying a breeze!! I highly recommend this book whether for homeschooled or to supplement the county curriculum. It is top notch!

To be honest I love science especially if its about life and stuff like that.

love it

Great!!

As advertised

It is a good book, both of my kids use it in school and seems like both enjoy reading it! get the workbook as well in order to get the best out of it

school

This textbook came in better condition than was advertised. I decided to buy used textbooks, but wanted very good quality, so that is what I paid for. The book was better than expected, in excellent, if not new condition and the shipping was prompt.
