Part I: DESIGN AS UNIVERSAL REALITY. 1. The Essence of Design. 2. The Design Process. Part II: THE ELEMENTS OF DESIGN. 3. Line. 4. Space. 5. Shape and Form. 6. Texture. 7. Color. Part III: THE PRINCIPLES OF DESIGN. 8. Unity and Variety. 9. Balance, Rhythm, and Emphasis. 10. Proportion and Scale.

This book left me looking for more on design concepts so it did not hold my attention to much. There was too little in depth even for the abstract art work, so it fell short on the creative aspect for me.

Thank You, Talibah Salih

in my personal library

Great visuals. Not the same old images. Nice to have just for that. Documents updated trends and accomplishments in art and design. Good info to begin thinking about principles and concepts. Last half of book covers concepts that even degreed art or design majors may appreciate going over.

not too much mark, just like new, and it very quickly, but they send the book in my mailbox, I found it

several days after.

Needed for school /good

Came just in time for my design class. Book was just like new and most of all AFFORDABLE! Just get a used one and sell it for a higher price. :]

Once again, a book that lacks visual stimulation. How can one produce a textbook with examples of artwork if they're not printed in color? How can the student/consumer learn from pictures printed in black and white and get the full effect? My professor isn't exactly the sharpest tool in the shed, but she even said, "It will do." Thank the heavens I purchased it for \$0.75 on half.com because it was definitely not worth a penny more. Minus the fact that visually, it's boring, the definitions and concepts are easy to understand, but it is a book for high schoolers. This is absolutely not a college/university level textbook. I would not recommend.
