I like it, but it needs more songs in it

I got this book primarily for the song of Memory. The piano accompaniment is just great. This is a classical book.

This is an excellent reference for vocal instruction. I highly recommend it for anyone who enjoyed the musical.

The Vocal Selections from CATS, is just that, a ten song selection of the "vocals" from this great play. Unfortunately, the music included is only for piano and guitar. The CD released in 1982 of twenty-one selections, gives the listener a "complete" sound for the play now on video. One of the problems with the materials available from the play are the differing versions. A veiwer of "just the video" may get the impression that this "is" the play. When looking at the book, "CATS (The Book of

the Musical), then comparing to this vocal selections and the video it becomes clear of the differing versions of CATS. It is important that the reader of this book is aware of this fact. As a teacher, many of my students who look at these differing versions get confused by the character, costuming, and musical changes. This "Vocal Selections" however does give someone the ability to see many of the words of the most popular songs from the play and have a basic (piano) arrangement to accompany the work. I would recommend this book to persons wanting to prepare a solo performance and groups doing tributes to the show CATS. Finally, the book is a good value for the price and has some nice photographs arranged with the songs of the central characters for CATS.
