ASP Safety Fundamentals Exam Flashcard Study System: ASP Test Practice Questions & Review For The Associate Safety Professional Exam (Cards)

Synopsis

ASP Safety Fundamentals Exam Flashcard Study System uses repetitive methods of study to teach you how to break apart and quickly solve difficult test questions on the Associate Safety Professional Exam. Study after study has shown that spaced repetition is the most effective form of learning, and nothing beats flashcards when it comes to making repetitive learning fun and fast. Our flashcards enable you to study small, digestible bits of information that are easy to learn and give you exposure to the different question types and concepts. ASP Safety Fundamentals Exam Flashcard Study System covers: Disaster Recovery Plan, Terrorism, Safety Managers, Incentives Program, Environmental Management, Safety-Friendly Corporate Culture, Human Error Analysis, Workplace Stress, Ergonomics, Audits, Behavior-Based Safety, Cost-Benefit Analysis, Risk Assessment, Hazard Totem Poles, Accident Prevention, Fire Safety Concepts Tree, Safety Analyses, Spice Model, Proximate Cause, Heinrich's Axioms of Industrial Safety, Petersen's Accident/Incident Theory, Domino Theory of Accident Prevention, Anchorage, Bloodborne Pathogen Hazards, Electrical Safety Program, Endothermic Chemical Reactions, Hypergolic Reactions, Heat Hyperpyrexia, Heat Syncope, Thermal Injuries, Chilblains, Trenchfoot, Hypothermia, Frangible Discs, Internal Friction, Slipping Hazards, Ionizing Radiation, Noise in the Workplace, Asphyxiants, Carcinogens, Community Right-To-Know Act, Safety Engineers, Feedback, Product Safety Auditor, Cumulative Trauma Disorders, Ethics Credo, Mirror Test, Accident Investigation, and much more...

Customer Reviews

Learn How to Quickly Solve Difficult CSP Test Questions Here's a little "secret" about the Safety Fundamentals and Comprehensive Practice Examination: the CSP test is what we in the test preparation field call a "content driven" test. While some tests are looking to see what you are ABLE to learn, the purpose of the Certified Safety Professional (CSP) and Associate Safety Professional (ASP) Examination, offered by the Board of Certified Safety Professionals (BCSP), is to test your understanding of what you have already learned. The goal of the CSP test is to use a standardized testing process to create an objective assessment of a test taker's knowledge and skills. In other words, it's more about what you know than your ability to solve clever puzzles. This is good news for those who are serious about being prepared, because it boils down to a very simple strategy: You can succeed on the CSP test and become a Certified Safety Professional (CSP) by learning critical concepts on the test so that you are prepared for as many questions as possible. Repetition and thorough preparation is a process that rewards those who are serious about being prepared, which means that succeeding on the CSP test is within the reach of virtually anyone interested in learning the material. This is great news! It means that if you've been worried about your upcoming CSP test, you can rest easy IF you have a good strategy for knowing what to study and how to effectively use repetition to your advantage. But it also creates another set of problems. If you tried to memorize every single possible thing you can for the CSP test, the field of possible things to review would be so huge that you could not hope to cover everything in a reasonable time. That's why we created the CSP Exam Flashcard Study System: we have taken all of the possible topics and reduced them down to the hundreds of concepts you must know and provided an easy-to-use learning method to guarantee success on the CSP test. We wanted this system to be simple, effective, and fast so that you can succeed on your CSP test with a minimum amount of time spent preparing for it. --Here Are Some of the Features of Our CSP Exam Flashcard Study System Study after study has shown that repetition is the most effective form of learning- and nothing beats flashcards when it comes to making repetitive learning fun and fast. Flashcards engage more of your senses in the learning process- you "compete" with yourself to see if you know the answers to the questions, and the flipping action gets you actively involved in the learning process. Our cards are printed on heavy, bright white 67 lb. cover stock, and are laser printed at 1200 dpi on our industrial printers- these are professional-quality cards that will not smear or wear out with heavy usage. We cover the major content areas on the exam. Our flashcards include an edge that is micro-perforated, which means that you are much less likely to have a painful papercut on your fingers when moving quickly through the cards. Our cards are portable, making it easy for you to grab a few and study while

waiting for the bus or the doctor, or anywhere where you have a spare moment that would otherwise be wasted. Our CSP test cards are written in an easy to understand, straightforward style - we don't include any more technical jargon than what you need to pass the test. The cards are a generous size- 3.67 x 4.25 inches- they fit perfectly in your hands and they aren't so small that you have to use a magnifying glass to read tiny type- all questions and answers are in a normal-size print for easy studying. Our cards include in-depth explanations- you won't see any "one word" answers on our cards that require you to go get a textbook to understand why your answer was wrong- all of our cards include generous, thorough explanations so you not only get it right or wrong- but you also know why! We use a font created by Microsoft to make reading easier- this will enable you to absorb more information painlessly during late night study sessions. Our system enables you to study in small, digestible bits of information- unlike using boring textbooks, flashcards turn learning into a "game" you can play until you've mastered the material. It's easy for a friend to help you study- they don't even have to know anything about the CSP test- if they can read, then they can quiz you with our flashcards! Now, let us explain what the CSP Exam Flashcard Study System is not. It is not a comprehensive review of your education, as there's no way we could fit that onto a single set of flashcards. Don't get us wrong: we're not saying that memorization alone will automatically result in a passing CSP test score- you have to have the ability to apply it as well. However, without the foundation of the core concepts, you cannot possibly hope to apply the information. After all, you can't apply what you don't know. CSP Exam Flashcard Study System is a compilation of the hundreds of critical concepts you must understand to pass the CSP test. Nothing more, nothing less. --If you think there's even the smallest chance that these flashcards will help you, you owe it to yourself to try them out. Don't let fear or doubt stand in the way of your opportunity to achieve the test score you need to fulfill your dreams.

I am new to the BCSP process as I have been leading EHS in two separate companies for close to a decade. Now I have decided to get my certifications and looked for study help for the ASP first, and then the CSP next. I decided to purchase the Flash Card Study system and it was worth my money and time. It is very indepth and a good study help. I went through each card maybe 6 times. I decided to take the ASP about three weeks prior and received the flash cards less than one week prior to the test. I passed the test and now have my ASP certification. Thanks, in part, to the Mometrix Flash Card System.

Opened the flash cards and started using them IMMEDIATELY - they are comprehensive, yet the

study points are short enough to remember. The questions are set up by the 7 topic domains of the exam - and # of questions in each domain reflect the % of that domain on the exam. I think I will keep them sitting next to my computer so that when I get a few minutes I can go thru a few - it's a great way to determine what info I already know (put card in one stack off to the side) and info I need to work on still. I feel like I am being efficient w/ my studying and NOT wasting time reviewing stuff I already have a handle on. GREAT product!

There was a comment critic site that said too much written information was on just one card. I disagree. The whole idea of flash cards is a simple memory signal for covered material in the textbook. My plan is to use the cards for a memory tool and to research information for the study text that is recommended from the Board of Safety Engineers.

These study guides/aids were recently purchased in the month of July. I am still in the process of utilizing them, and have learned a great deal of information in such a short time. They are providing me with the information that I will need in preparation of the ASP Exam in the near future.

So far these flash cards have been giving me a good idea of what needs to be studied. With most of the questions I look up other resources on the web to get a better understanding.

I have looked at plenty of study material for the ASP exam. If you want to read a paragraph for answers then these flashcards are for you. I personally did not find these helpful. A paragraph long answer does not take you straight to the root of what the answers will be on the actual exam.

I am enjoying the Flash Cards.

The material presented is unique for a series of "flashcards", yet for all that they've been tremendously helpful in my study plan. These cards are one tool among several that I'm using to prepare and I can definitely say I'm happy I purchased them.
