Head, Shoulders, Knees And Toes...

Synopsis

This award winning series has been specifically designed for babies. A great introduction to books through well-known nursery rhymes and interactive text. Singing songs and rhymes is the perfect way to bond with your baby and share quality time. It also aids language development by introducing them to the natural sounds and patterns of speech. Combining these with actions also stimulates the brain and helps muscle development.

Customer Reviews

Abbreviated traditional, action rhyme/song (music supplied) introducing eight parts of the body.

Realistic colour illustrations modelling babies doing actions.--Opal Dunn"Nursery World"

(03/08/2007)

I am always looking for books to share with the grandkids. This book is perfect for a young child. There are several ways to enjoy this book. Two we have enjoyed are: singing the song ("Head, shoulders, knees and toes") with the words of the book or just read them out while pointing to the picture and on the child reading (Read head, point to head). Our grandson responded well to the faces of the babies in this book. I would give this as a gift to any young child. Annie Kubler's did an excellent creating pictures that are bright and happy, which is perfect for a very young child.

who doesn't know "head and shoulders, knees and toes" song...plus it has beautiful illustrations with all different kids pointing at their body parts. My baby loved it

Purchased for baby grandson. His parents and older siblings read/sang it to him. Nice that the music is printed in the book, along with the motions.

I love it. Cute illustrations. The prose is like the song. My toddler loves to follow along and point to body parts.

our baby girls favorite book & song still. She's nearly 18 months old and she still brings me this book the most. She can be very stubborn about having this book read over another by pushing it into my lap mostly. as the momma i've considered putting the book up just to give me a break from this favorite, any book read too many times in a row gets tiresome after awhile. i only put it up once because she hit me with it, it was returned to the bookshelf while she was taking a nap. she has learned her head and her nose already and shows an interest in knees and toes. she will tap mommy's & daddy's shoulders but not her own yet. we sing the song, read the book and even have a dvd for this song (baby einstein). as soon as the song starts on the dvd she goes and gets her book while waiting for her check up another mom said something to her child about being careful not to bonk his head and when the lady said "head" our baby touched her own head much to the other mom's surprise. our baby girl is fairly quiet when we are out (if its a new place) and loves to look at her books. giving her a book in the waiting room is better then giving her a toy. i only mention this because kids are amused by different things. there is no saying an active child would love this (or any other) book as much. i do think because it has actions and song mixed in with the book it would be a hit with any child...for wear & tear this is signs of aging already but all of her board books show their age, she chews on them when she's teething. so far they are preferred over actual teething toys. the size seems to be perfect for her the illustrations however don't seem to engage her attention as much as some of her other books, she seems to be in a hurry to flip the pages. She will pause on one set and stare hard at the pictures. which pages changes and i have not figured out what it is that makes her look like she is thinking so hard. as long as she keeps handing it to me i will keep reading/singing it to her.

This is a great little board book! It has great illustrations and not too many words per page. That's important with baby books, their attention span

isn't very long and they want to turn the page quickly. I have bought this several times for little ones and love singing the song and using this book to initiate learning body parts and having some music and reading time all in one. :)

Packaged well, beautiful vibrant colors. Great for one of babies first books. So happy I found it :)

Perfect size for toddler hands. Sturdy cardboard.
