“This guide to the eclipse is the definitive handbook for everyone considering Tennessee as their viewing location and will help visitors and locals effectively plan and maximize their minutes in the darkness.” Loren Nelson, Chair of Teton Photography Group

Polar explorer Aaron Linsdau is the second only American to ski alone from the coast of Antarctica to the South Pole, setting a world record for the longest expedition ever for that trip. He has walked across Yellowstone National Park in winter, crossed the Greenland tundra alone, has trekked through the Sahara desert, attempted to climb Denali solo, and successfully climbed Mt. Kilimanjaro. Aaron is an Eagle Scout and has received the Outstanding Eagle Scout Award. He holds a bachelor's degree in electrical engineering and a master's degree in computational science. Aaron wrote the book & produced the film Antarctic Tears, is a commercial photographer, and loves inspiring audiences with his stories and experiences.

This book was a waste of money. It was only a template and my eclipse experience was NOTHING like he predicted. It is kitsch now. I love it more now because I can have a laugh at him and his two sticks of butter. Dude made out like a bandit. This book is small, the maps are not legible and most of the book was sensationalist tripe. I am glad I bought it but on the other hand I feel ripped off. I saw totality in a beautiful location and had no traffic problem and was able to book a nice room that was not overly expensive. Buy it for a laugh. Just don't take this man as seriously as he takes himself

This information packed guide, in a small package, is all you need for the total eclipse. The author provides you with who, what, when where and why you could possibly need for the best experience.
