Raising the flaps on each spread of this lift-up counting book reveals fanciful insects in increasing numbers, from "one tough bug" with barbells, to "seven space bugs" surrounded by stars and planets, to "ten saw bugs," whose snouts indeed consist of saws. Startlingly bright illustrations and elaborate paper engineering should attract young children's attention. However, the cleverness to the made-up insects varies widely; groups such as "three pretty bugs" and "nine very long-necked bugs" seem rather tame in contrast to the rest. Ages 3-6. Bought this many years ago for my sons - they loved it! Now my grandson loves it, but it's not in the best condition. Was thrilled to find it on , only to be disappointed that it's a mini version, not as sturdy - the flaps and pull tabs could easily rip without a very gentle touch (can barely open 6 hungry frogs box enough to read flap - strings seem too short). It certainly won't stand the test of time like the original.

I have bought 8 of these books for my granddaughter. I have absolutely loved them all until this one. Three of the ten pages (pop ups) are in other "bug books" by this author. I am sad that there is a need to repeat pages from other books. There probably would have been more repetitive pages if I had access to all the books. I wish I had bought this one first, and then I would have loved it. What a shame!

This was one of my favorite books as a kid. When my 3 year old son found my beat up old copy at my parents' house, he loved it so much that I had to buy him a copy that actually has all of the flaps! I was so glad to see that it is still in print. My only complaint is that the new book is smaller, which makes some of the boxes a bit more fiddly to operate, but I noticed because I have both copies at hand.

My son loves this but I can see it easily ripping apart.

I happen to love David Carter books and this one does not disappoint! The pop-up ability makes it an interactive book and so makes it a great shared experience for both child and adult. As always, his illustrations are funny, vibrant and so well done. This is also a great way to teach a child to respect a book...we tell my granddaughter to use "nice" hands when exploring...but the card stock makes the pages durable enough that they can take a toddler's handling.

I was rather disappointed in the book. the first few pages were fine and the last few pop-ups were very squashed together .

Its a cute book but all the pop ups are really flimsy and break very easily.. kind of a bummer

So cute. My two year old adores this book and my five year old likes it too.
