Prefabulous And Sustainable: Building And Customizing An Affordable, Energy-Efficient Home

Synopsis

Prefabulous and Sustainable dispels the negative myths associated with prefab homes and shows the reader how beautiful and remarkably green prefab homes are. In this guide to prefab home-building author Sheri Koones, demystifies the prefabricated house by using 25 unique homes to showcase how factory-built homes are greener, more efficient, sturdier, and more cost-effective than site-built homes. The book is divided into 3 categories—green, greener, greenest—and the homes featured vary in style, design, type of construction, and size. All of the homes included in Prefabulous and Sustainable have been customized to create a level of sustainability beyond the inherent qualities of prefab. Written in an easy to understand and approachable style, author Sheri Koones walks the readers through each of the homes, explaining the materials, strategies, and systems used to create a sustainable living environment. Photographs, captions, floor plans, and sidebars illustrate to readers that green living is not as complicated as one might think, and attainable for everyone. Also included is a resource guide, making this book a hand-on guide for homebuilders. **Praise for Prefabulous + Sustainable** “Authoritative and beautiful. Once again, Koones builds her case for pre-fab thoroughly, and presents it in a compelling, well-organized package.” —Allen Norwood, NAREE Book Competition Head Judge

Customer Reviews

Sheri Koones is a widely respected author who helps readers understand that getting the house of

their dreams can be done in an ecologically responsible way. Her book, Prefabulous, explored the variety, beauty and eco-friendly benefits of prefab homes and recently won the prestigious Gold Award in the 2008 Robert Bruss Real Estate Book Awards from NAREE. Sheri is a member of the National Association of Real Estate Editors, the Sustainable Building Industry Council, and the American Society of Journalists and Authors. Sheri is also a columnist for Home Resource Guide and a freelance writer and speaker. She lives in Connecticut.

Love this book by Sherri Koonen. We are design build general contractors who build with off-site modular construction .. Our company USModular Inc. ([...]) gives this and other books by Sherri to prospective clients to help them visualize their new home and the possibilities of design with modular construction. Perfect book to show that modular construction is better than site built . Bill Cavanaugh USModular Inc. [...]

Amazing homes utilizing the latest in green tech. The books are gorgeously photographed, with great detail and instruction about the materials used.

Really great ideas. Full of information for anyone interested in modular homes that don't look like a box.

Great book if you are thinking of building a prefab. I did get some ideas from photos of interiors after completion.

Very good content and information. A must buy.

Informative book about the potential in prefab custom homes. Wish there had been financial data reported as in cost comparisons per square foot for different options.

Good reference material

gorgeous book for the Green Gal that I am!
