I have been following Kimberly's Blog for a number of years and own all her previous books, as quite frankly; she offers some unique perspectives on healthy eating and a healthy lifestyle, and has the credentials to back it up. She is a Certified Nutritionist, a dedicated Yogi, and is currently pursuing a Doctorate in Ayurvedic Medicine -this is no mommy blogger writing based on thoughts -she has the knowledge and education to back up her work! In this book she co-authors with Deepak Chopra MD who is at the forefront of integrative medicine - which I personally believe might be the way we should be heading, rather than the current medical model where people get sick and look for a pill not a solution; and as a result, we continue to be a Nation that spends more than any other on healthcare, without better results! In a nutshell, we have two people coming together in one book to help us all get healthy bodies, minds and souls! This book is all inclusive rather than many traditional books that simply look at diet, or exercise, or mindfulness, thus book does it all through six pillars: Internal Nourishment this looks at our preconceived notions on what is "healthy", how food impacts our overall health, and helps create a change to optimize nutrition and build health from the inside out. External Nourishment this chapter looks at what we put on our skin; after all, it's our largest organ; and one we tend to slather with chemical lotions and potions in a quest for wellness and youth. It looks at toxic ingredients and healthy replacements with some simple ideas for masks, lotions and even deodorant. Peak Beauty Sleep -sleep is of course integral to our health and this along with diet, when poor, has found to be the biggest pathway to ill health and a shorter life span. The book has tips for a better night's sleep from sleep inducing foods to suggested supplements. Primal beauty this is going back to nature, and aligning our routines to those of nature such as solar and lunar cycles. I particularly love the focus on reducing the toxicity in our homes and personal spaces; as it's something I think about but often fail to modify! Beautiful movement exercise of course. But this, unlike other books which tell us to do more exercise, more often -examines the consequences of over exercising, - and looks to regain balance; it is also heavily yoga focused, which as a Yogi myself, I love! Spiritual Beauty this is creating peace in your mind, with yourself creating a calm being. There are good questionnaires, and some excellent meditation tips and techniques. There are also some good steps which seem based on emotional intelligence, which is a pillar that can be learned, and be most effective. Finally the book has some great recipes, which I appreciate as many of Kimberley's recipes have become staples in our home over the past few years so I am

excited to try some new ideas! This is a fantastic book that truly takes a 360 approach to health, wellness, diet, exercise, body, mind and soul. I will refer to it again and again!

It is not a bad book, but I couldn't find anything new on it. It is a compilation of what he has said in other books, presented in a slightly different way.

I really loved this book it was very informative. Easy to apply to your life if you are looking for enlightenment.

A great book with much information on life's journey.

I love the Beauty Detox series and this book delves deeper into living your life (beyond your plate) in a healthy, harmonious way!
