Poorly formatted, even for a self published book. It has really wide margins along the edges (limiting the size of the boxes) and then the available space to draw the comic is limited by the binding. Much of the boxing occurs where the bend is at the seam, making it hard (especially for kids) to draw in that space. Fixing the margin could have prevented this issue. Will not buy again.

I knew going in that I wasn’t using this as it’s intended purpose, I was going to use it as a sort of

memory book and THAT is the only reason it’s getting a 3 star. otherwise it would probably be lower.The paper quality isn’t great. Unless you are using a very light handed pencil, it will bleed through. The outside margin is large, leaving some of the boxes pushed into the seam of the book where you can’t draw or write without breaking the spine of the book.I would think there would be more actual "comic" pages. The entire book consists of 13 repeating signatures. Each signature consists of a blank page, "Story Outline" page, 2 "Draft Drawing" pages, and 4 actual comic panel pages with 5-13 panels on each page. There are more writing/empty pages than there are actual comic panel pages.This would probably be ideal for younger children who just want to do rudimentary drawings and pretend to write a comic book or to write their first comic book as a youngster.

5th grade nephew was beyond excited to get this.

My son had to study some other of his comic books to see how to use all the different types of word bubbles. He likes the book and uses it. Age 9.

There’s not much to say about this, the book is exactly what it says: a blank comic book!

My son wants to write comic strips for a living so this was perfect for him. He can draw his comics without having to draw the cels

My 7yo loves it and my 11yo was a little jealous.

great
